A new way of living arrives to Germany as PHNX opens its doors in Hamburg

Co-living mixes plug and play concept with social inspired spaces and events

PHNX opened its doors the 1st of July 2020.

The 225 room aparthotel has an industrial and urban design that honours the heritage from the repurposed 1940s iconic building from the Phoenix Complex in Harburg; located just across the street from the train station.

PHNX Co-living Hamburg aim is to create a built-in community for students, professionals and travellers that are looking for a plug and play concept, where they only need to worry about enjoying their stay in Hamburg. They can stay as little as one night or as long as several months.

The building shows the PHNX vibrant, open and playful character by incorporating colorful and multi-texture interiors in the common spaces. Wood, metal, tiles and big windows mix with the energetic and social atmosphere. At PHNX residents can study, work and chill and we even have a Paternoster, one of the few original elevators from the last century in the city.

Co-living: the new way of living

The co-living lifestyle is the perfect balance between private refuge and Community. PHNX is not only an accommodation but a place to enrich personal and professional life through social connection, networking and learning. Say hello to total flexibility

PHNX adapts to the individual lifestyle of our customers, where guests can stay for as little as one night or as long as several months. A range of room types and sizes are available featuring soundproof windows, a built in and fully equipped kitchenette, private bathroom and the best hotel tech including high speed internet and digital check in. All guests have access to a modern and practical Laundry Room. Pet friendly rooms are also available.

Social inspired spaces and events & Coworking

PHNX offers two common spaces to share and mingle, the Skylounge and the Board Room are available for guests but can also be rented for private events. Curated community events to enhance the life of guests take place between these walls every week. Wellness, growth and fun are the topics for gatherings and happenings.

The 4th floor Lounge offers views of the city and has a restaurant/bar serving fresh and healthy food to fuel productivity. The Board Room features a 24hrs accessible quiet space to work or study. Both spaces have an industrial spirit that can inspire both dreamers and doers.

Sustainability

Sustainability is the core of our culture, vision, values and brand. Our goal is to reduce every guest's environmental footprint and support local and global causes.

- Architecture: Energy efficient windows and doors and fully wheel chair-accessible rooms
- Materials: Recycled paper and responsible supplies
- Food and drinks: Organic and locally sourced ingredients and Third Wave coffee & teas.

To accomplish their goals, PHNX partners with local and global organizations. For example, globally with Plant for the Planet to fight climate crisis, planting monthly one tree per room and locally with Hanseatic Help to help those without a home through volunteering and donations.

Awards

PHNX has proudly be awarded with the following 2 awards:

European Property Awards: New Hotel Construction & design, Germany, 2020-2021

LIV Hospitality Awards: Best Co-Living Interior Design, 2020
